Closing digital divide must be top priority: Tim Berners-Lee

13/06/2020 - 07:44:00

By Press Association

World wide web inventor Tim Berners-Lee has said the Covid-19 pandemic demonstrates "the gross inequality" of a world where almost half the population is unable to connect to the internet.

He told a high-level UN meeting that "our number one focus must be to close the digital divide".

Students risk losing out as online teaching creates 'digital divide'

Many do not have access to broadband or teachers are ill-equipped to teach remotely

© Mon, Mar 23, 2020, 02:15

Carl O'Brien, Michaelle McBride

Covid-19 exposed 'digital divide' facing parents

The main digital constraints were access to devices, dependency on one device, and data access, where many parents only had phone data bundles insufficient for the bandwidth demands of remote learning, the study found.

World wide web inventor Tim Berners-Lee has said the Covid-19 pandemic demonstrates "the gross inequality" of a world where almost half the population is unable to connect to the internet.

He told a high-level UN meeting that "our number one focus must be to close the digital divide".

Digital Inclusion is not just an Irish challenge...

Digital competence is “**a universal and basic need for all citizens for working, living and learning** in the knowledge society” – *European JRC*

ENSURE INCLUSIVE AND EQUITABLE QUALITY EDUCATION AND PROMOTE LIFELONG LEARNING OPPORTUNITIES FOR ALL

What did we do...

- **Research, market scans & testing** for suitable assessment solutions, skills framework analysis, training needs analysis, community-based consultations...
- **Learner workshops** – to adapt DigComp into real-world context based on community-user experiences (UX)
- **Ed & Ed Tech workshops** with Accenture technical development teams – prototype launch
- MVP – develop a **proof of concept**
- Created a **national - targeted - train-the-trainer programme** for tutors in community organisations & FET sector
- Raised **awareness** and harvested **feedback**

About DigComp 2.1...

The 'European Digital Competence Framework for Citizens', also known as DigComp, was developed to offer a framework to improve citizens' digital competence.

There are five different areas encompassing 21 different skills which create the framework for understanding the digital skills needed for life, work and learning.

Competence area 1: Information and data literacy

- 1.1 Browsing, searching, filtering data, information and digital content
- 1.2 Evaluating data, information and digital content
- 1.3 Managing data, information and digital content

Competence area 2: Communication and collaboration

- 2.1 Interacting through digital technologies
- 2.2 Sharing through digital technologies
- 2.3 Engaging in citizenship through digital technologies
- 2.4 Collaborating through digital technologies
- 2.5 Netiquette
- 2.6 Managing digital identity

Competence area 3: Digital content creation

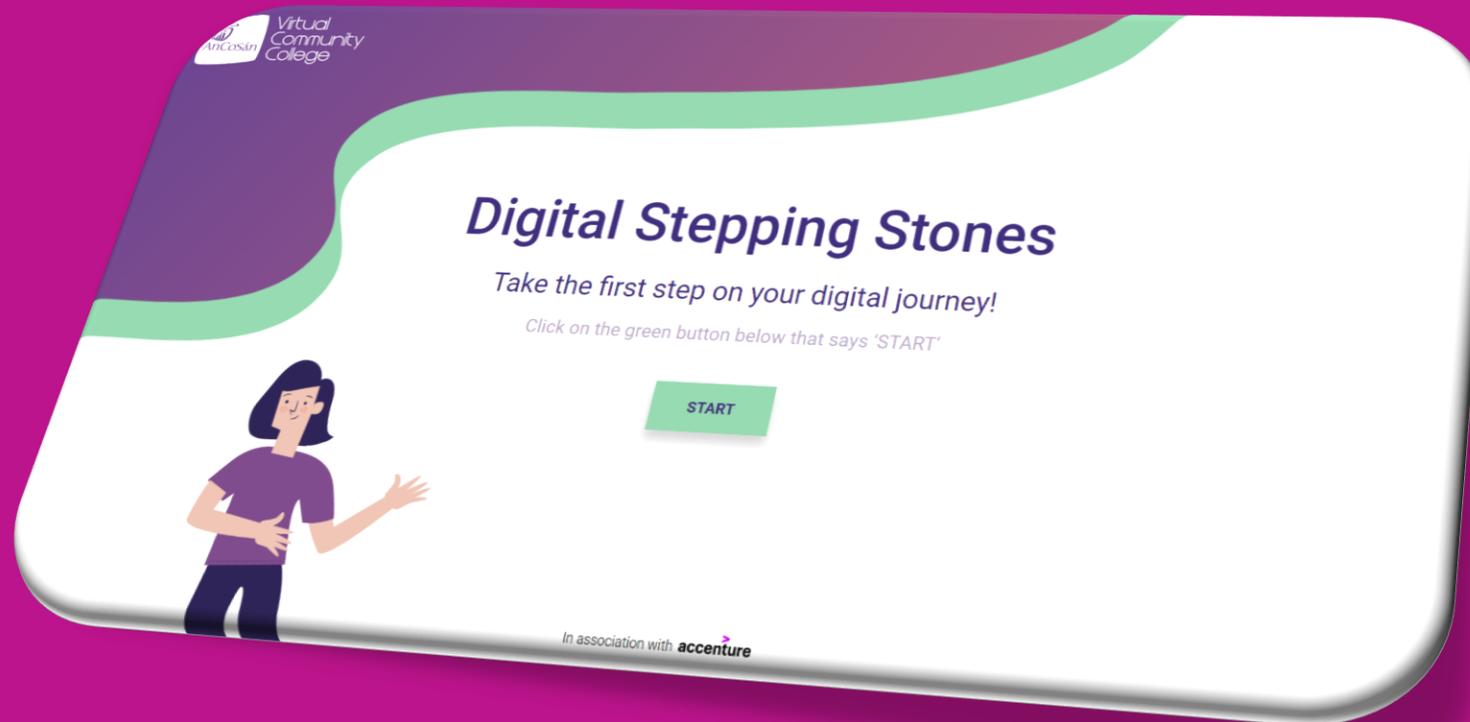

- 3.1 Developing digital content
- 3.2 Integrating and re-elaborating digital content
- 3.3 Copyright and licences
- 3.4 Programming

Competence area 4: Safety

- 4.1 Protecting devices
- 4.2 Protecting personal data and privacy
- 4.3 Protecting health and well-being
- 4.4 Protecting the environment

Competence area 5: Problem solving

- 5.1 Solving technical problems
- 5.2 Identifying needs and technological responses
- 5.3 Creatively using digital technologies
- 5.4 Identifying digital competence gaps

Digital Stepping Stones...

A Digital Assessment Tool to encourage a 'Growth Mindset' towards **Lifelong Digital Learning** in Adult & Community Learners

We wanted to help people take the first step to...

- understand their current digital capability
- appreciate the digital skills they have
- see how their initial skills can be transferable
- appreciate there are a range of competences needed in the 21st century
- and fill any gaps in their basic digital skills

In 2019, An Cosán envisioned an Ireland where everyone can avail of the **life-enhancing benefits of having the digital skills** they need!...

Today over **5,300** people have used our Digital Stepping Stones assessment tool **to understand their personal level of digital competence...** and their gaps!

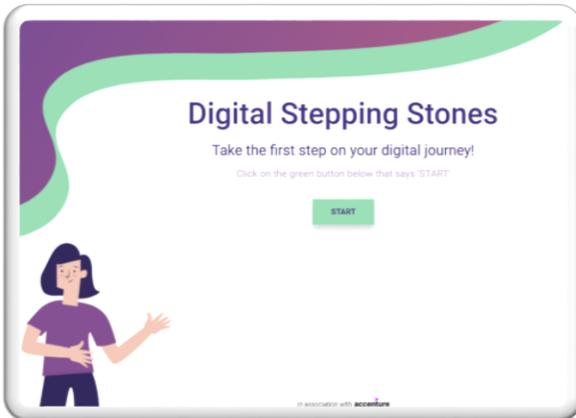

How does Digital Stepping Stones help?

Our DigComp digital inclusion model uses 'assessment-for-learning'

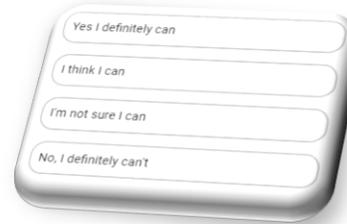

5 Areas 21 Competences

No registration – simply click start...

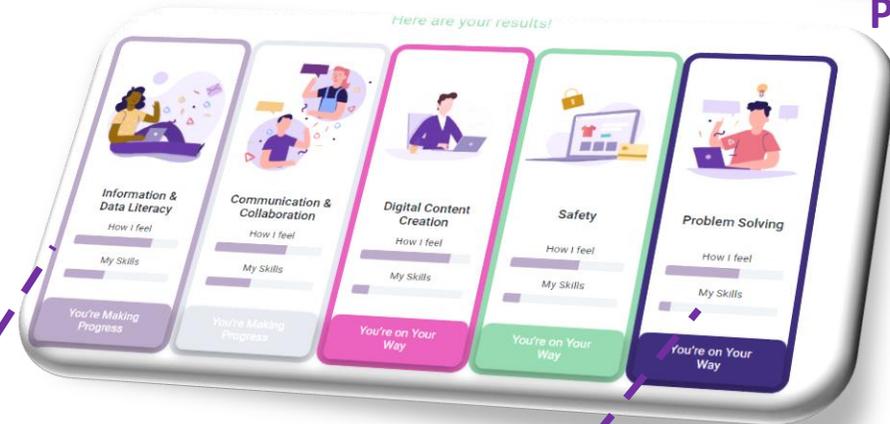

1. How I Feel

2. My Skills

Approx. 15 mins to complete

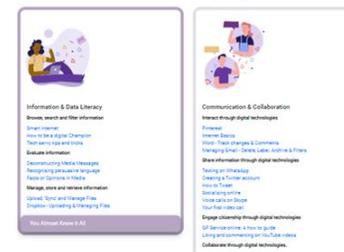

Level of digital confidence

Personalised Results

Ready To Take The Next Digital Step?

Well done on completing the quiz. Now, why not take the next step on your digital stepping stones with some of the learning links below tailored just for you!

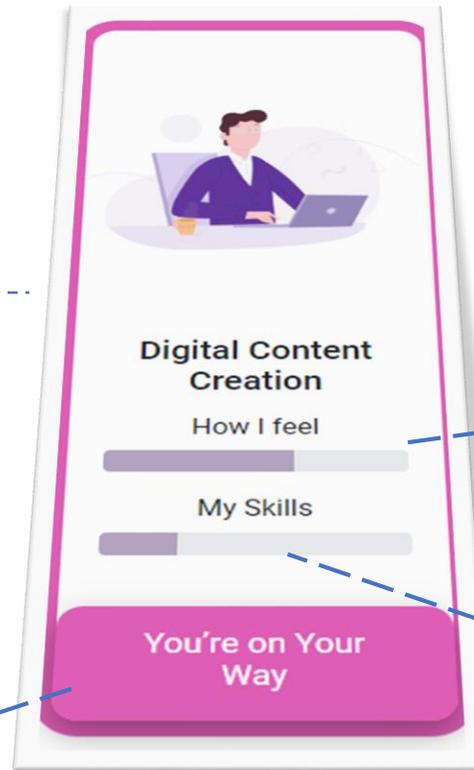

Personal learning links

Level of digital competence

Personalised Set of Results

Well done Steven!

Here are your results!

An algorithm generates a results page

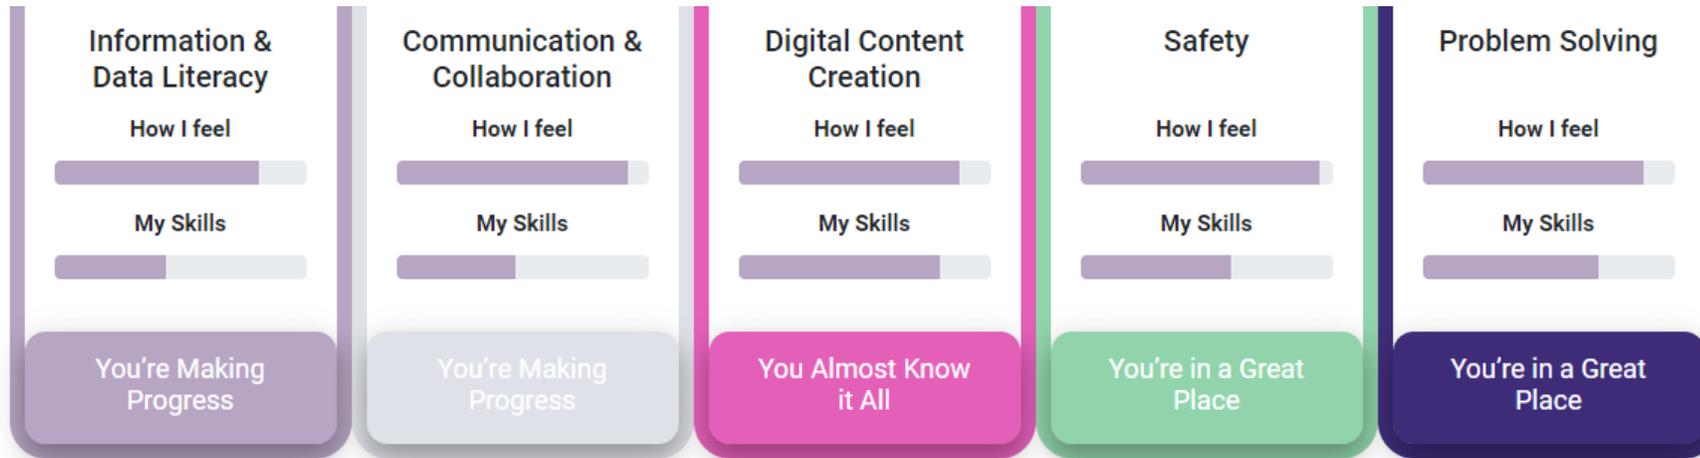

- correlating the answers from 'How I Feel' against 'My Skills'
- so it's easy to see if a learner's digital confidence matches their digital knowledge
- across each of the five DigComp competence areas.

The result here shows that a learner has a greater level of confidence in their ability than is seen in the My Skills result.

Where a learner's results show a low bar, this indicates an opportunity to focus a learning plan towards improving digital knowledge or skill in that competence area.

Results are communicated in a positive, growth-orientated way

Communicating results for a Growth Mindset...

My Skills Score	Output Text
0-25	You're on Your Way
25-50	You're Making Progress
50-75	You're in a Great Place
75-100	You Almost Know it All

Detailed results sent by email link to tutor & learner...

In the detailed report,

- the correct answers are highlighted on the left column
- making it easy to see where a learner may have selected an incorrect answer,
- or only part of the answer
- This would indicate a learner may benefit from further learning in this area

Left side = correct options

Right side = Learner selection

	Correct Answers	Your Answers
<p>A search engine is used to look things up online</p> <p>If you wanted to know the capital of Denmark of the following engines, which would you select as the answer? (Select all that apply)</p>	<p>Bing</p> <p>Google</p> <p>Microsoft</p> <p>Yahoo</p>	<p>Bing</p> <p>Google</p> <p>Microsoft</p> <p>Yahoo</p>
<p>Domain is the name given to a website address (E.g. www.google.com). Some domains should be trusted less than others.</p> <p>Besides .com, what domains should you trust? (Select all that apply)</p>	<p>.gov</p> <p>.edu</p> <p>.ninja</p> <p>.ie</p>	<p>.gov</p> <p>.edu</p> <p>.ninja</p> <p>.ie</p>
<p>When naming a file, what should you do? (Select all that apply)</p>	<p>Keep the name consistent with other related files</p> <p>Call it anything using random letters and numbers</p> <p>Make the name meaningful to you and others who might use it</p> <p>Choose a name that allows you to find the file easily</p>	<p>Keep the name consistent with other related files</p> <p>Call it anything using random letters and numbers</p> <p>Make the name meaningful to you and others who might use it</p> <p>Choose a name that allows you to find the file easily</p>

FET & community sector practitioner feedback...

“This will **probably come to be a standard tool for digital assessment across the entire country**. Well done on a fantastic piece of work!” (ETB *Donegal*)

“I think it would be **very useful for the Guidance workers and Community Development team**.” (Local Development, *Wexford*)

“I am directing learners to it, as part of the process of being considered for a device loan, **to support blended learning**”... (ETB, *Limerick*)

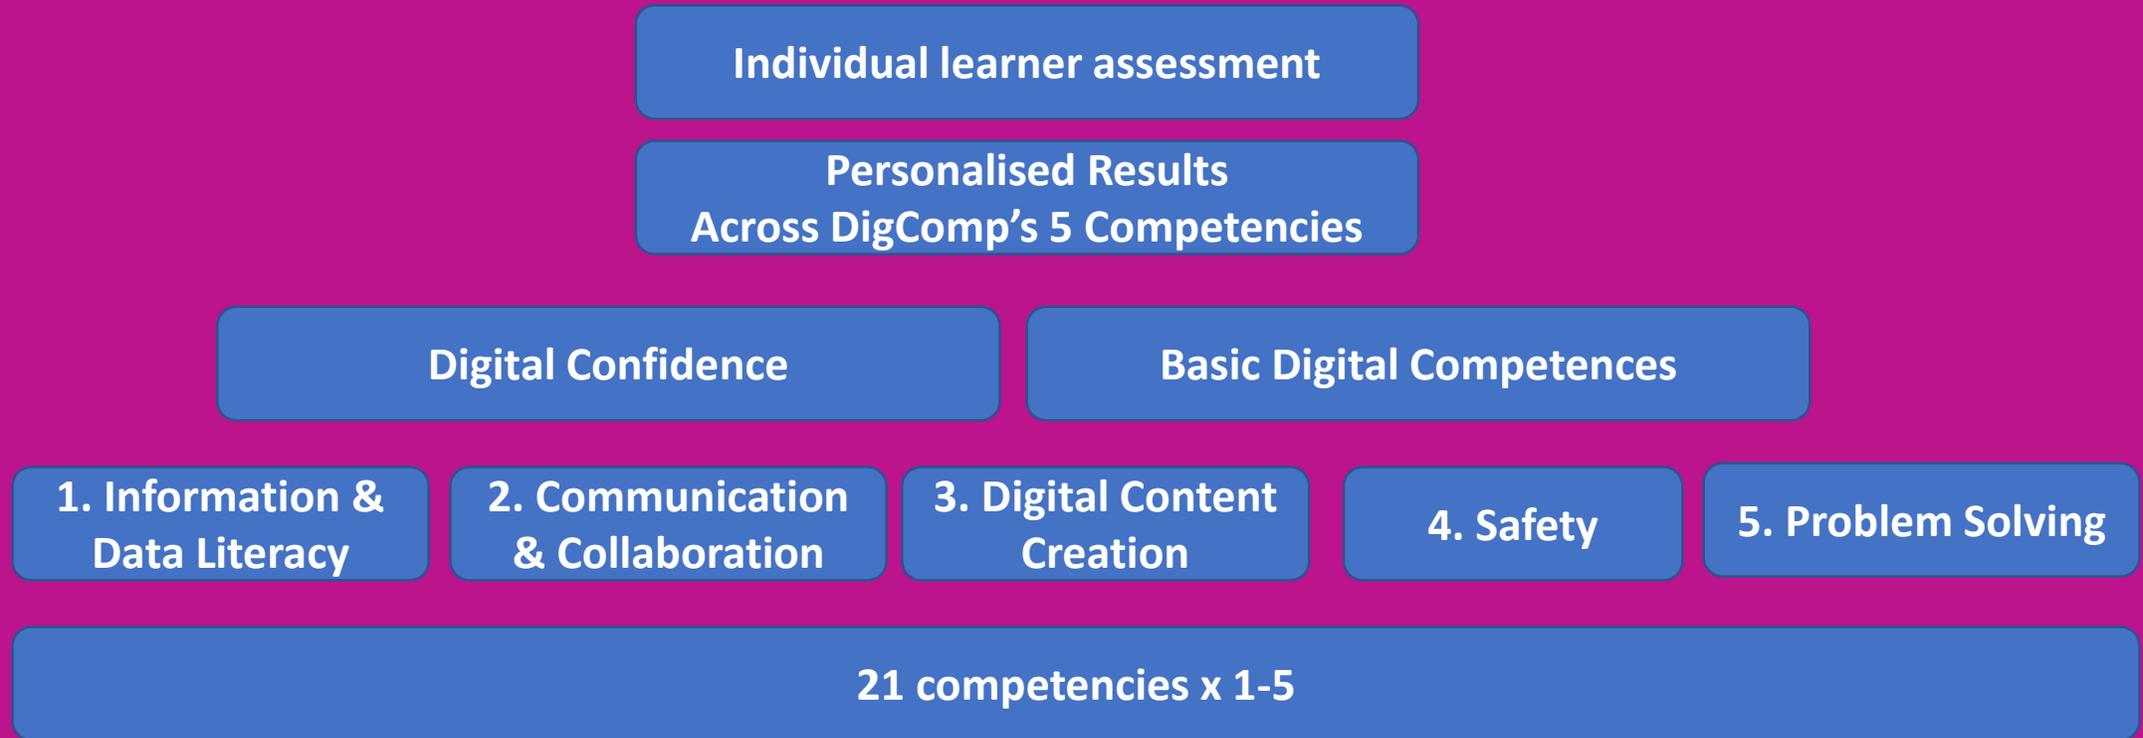

“Digital Stepping Stones is **a great tool for ETBs to use with learners & staff**.” (ETB, *Cork*)

“Our ICT instructor is **completing it with learners as part of our ongoing induction programme**.” (CTC, *Dublin*)

“I feel Digital Stepping Stones will be **a great asset** to us” (YouthReach, *Dublin*)

“The Digital Stepping Stones is a great help. **It is very user friendly**. The hyperlinks section will be so useful.” (FRC, *Meath*)

So what's the next step on the Digital journey?...

1.1 Browsing, searching, filtering data, information and digital content
1.2 Evaluating data, information and digital content
1.3 Managing data, information and digital content

- 2.1 Interacting through digital technologies
- 2.2 Sharing through digital technologies
- 2.3 Engaging in citizenship through digital technologies
- 2.4 Collaborating through digital technologies
- 2.5 Netiquette
- 2.6 Managing digital identity

- 3.1 Developing digital content
- 3.2 Integrating and re-elaborating digital content
- 3.3 Copyright and licences
- 3.4 Programming

- 4.1 Protecting devices
- 4.2 Protecting personal data and privacy
- 4.3 Protecting health and well-being
- 4.4 Protecting the environment

- 5.1 Solving technical problems
- 5.2 Identifying needs and technological responses
- 5.3 Creatively using digital technologies
- 5.4 Identifying digital competence gaps

Developing 21 E-learning mini-modules... One for each DigComp competence

Welcome to the Evaluating Data, Information and Digital Content lesson

GET STARTED

In this lesson, we will look at why evaluating information is an important part of the digital literacy process and learn some ways to assess information.

There are five parts in this lesson. You will need to complete all of them. This should take you approximately 10 minutes.

Scroll down the page and select Introduction to begin.

Today's digital landscape offers us extraordinary resources for learning. The information that we are not always accurate or high-quality.

- Introduction
- What is evaluating data/information/digital content
- How to evaluate information
- Practice
- Conclusion

Welcome to the Evaluating Data, Information and Digital Content lesson

0% COMPLETE

- What is evaluating data/information/digital content and w...
- How to evaluate information
- Practice
- Conclusion

Learning outcomes

By the end of this lesson, you should be able to:

- Explain why evaluating information is important
- Understand what a trusted source is
- Compare and contrast between reliable and unreliable sources
- Use at least one technique to perform an evaluation of information
- Apply the practice of critical thinking to evaluating information in your own life and online

Welcome to the Evaluating Data, Information and Digital Content lesson

0% COMPLETE

- Introduction
- What is evaluating data/information/digital content and w...
- How to evaluate information
- Practice
- Conclusion

Congratulations! You have almost completed this lesson.

All you have to do now is select all of the learning outcomes you feel you have achieved.

- I can explain why evaluating information is important
- I understand what a trusted source is
- I can compare and contrast between reliable and unreliable sources
- I can use at least one technique to perform an evaluation of information
- I can apply the practice of critical thinking to evaluating information in your own life and online
- None of the above

Well done! You now should have the competence to evaluate information, data and digital content at Levels 3-4 on DigComp, the European Digital Competence Framework.

Now that you have completed DigComp 1.2, you can go back to the homepage.

Thank you!...
